

A+ Automatic Control System

We set out to create a simple, cost-effective and flexible optimizing solution that is applicable to any of our ventilation or air-conditioning systems. In order to generate the greatest energy savings in a building, while ensuring a high level of indoor comfort, constantly tracking and adapting to the internal and external conditions is essential.

- A+ is able to control the complete HVAC system of the building.
- ControlAir room controllers + SUM management system.
- Efficient, automatic, real-time and demand-based operation - immediate energy savings.
- Complete and transparent overview and control of the indoor climate.
- All operating functions can be accessed through the SUM Web App.
